

Core Competencies

Think Forward Consulting, founded in 2006, is a technology consulting small business that implements integrated Business Process Design, Enterprise Architecture, and Information Security.

The company uses an Enterprise Architecture approach based on planning, performance management and business alignment to make measurable improvements for our customers.

Think Forward Snap Shot

- 10+ Years in Business
- Woman Owned Small Business (WOSB)

Expertise in:

- Cybersecurity
 - Cloud Assessments
 - AWS
 - RMF
 - NIST CSF
 - Cybersecurity Metrics
 - Cloud Security Engineering
- Enterprise Architecture
 - Business Process Design
 - Application Portfolio
 - Transition Planning
- IT Project Management
 - Agile Services
 - Agile Scrum
 - Jira, Confluence, Zepher

Key Differentiators

Cloud Technologies & FedRAMP – Streamlined Cloud security assessments including FedRAMP accreditations. Deliver compliant cloud technologies including designing, implementing and testing controls.

Security Metrics Program Development - NIST Cybersecurity Framework (CSF) SaaS. Enterprise-wide cybersecurity metrics aligned to the CSF. SaaS provides enterprise-wide metrics and pre-built automated feeds from ServiceNow, SCCM, Airwatch and Symantec.

3rd Party Vendor Security – Automated Vendor Risk Management tool. Built assessment survey to collect responses, includes recommendations report and scorecard mapped to the NIST CSF.

Cloud Security Engineering – Capabilities in end-to-end security engineering on AWS environment. Hardening RHEL, Bit9, Qualys, Symantec, SecureWorks and boundary protection.

Risk Management Framework Training – Leverage expertise in DICAP and RMF to deliver training. Direct experience training federal enterprises in RMF.

We are a small business driven to provide exceptional services, challenge the status quo, hire and retain outstanding talent to create meaningful impact for our customers.
